Main Entrance and Chapel, St. Luke's Hospital, San Francisco

TO THE READER

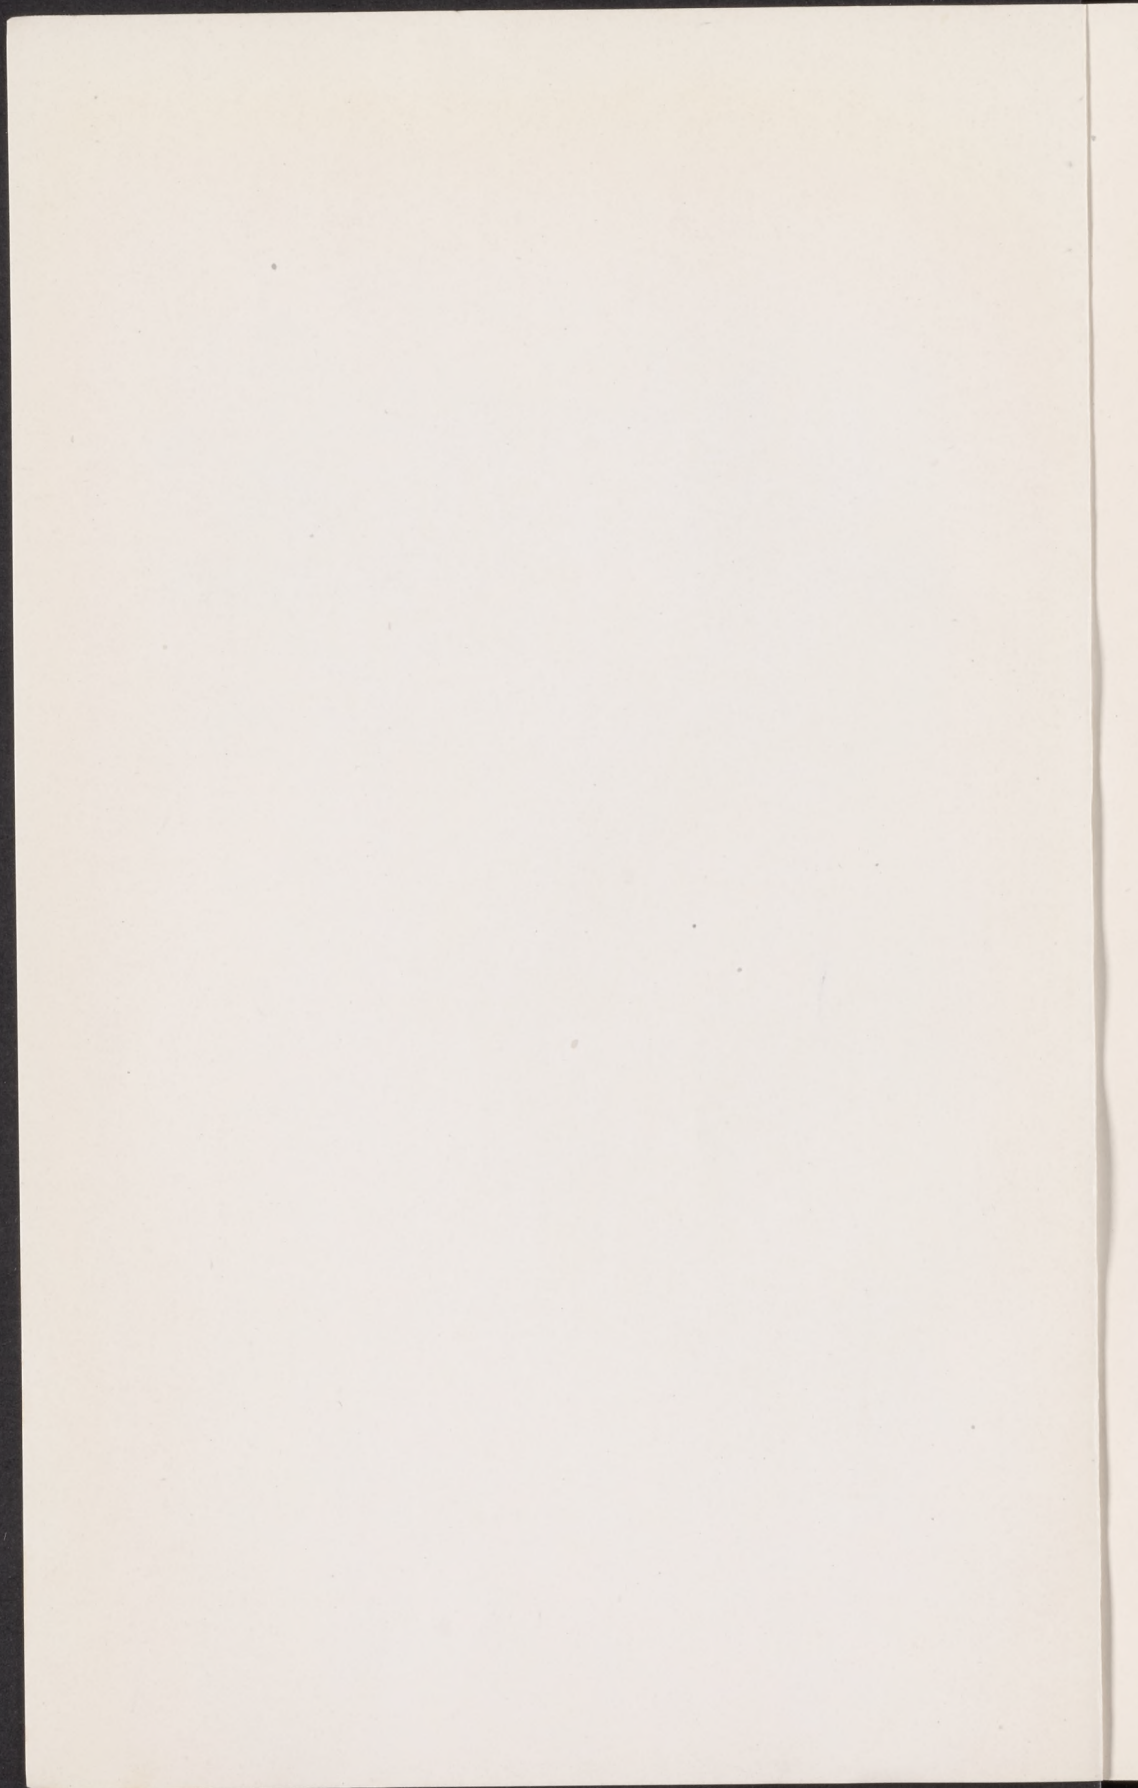

We want you to become familiar with the work of St. Luke's Hospital and especially with its aims.

St. Luke's Hospital is a corporation conducted with the object in view of furnishing free hospital and free medical care to deserving people, and is not a stock company. All money that may be made from the running of the hospital is returned in the form of care of free patients.

We invite you to become interested and, if interested, to visit the hospital, and we will be glad to welcome your advice or counsel.

We solicit subscriptions for any department of our work. We can arrange for you to assist directly in one of the special departments of the hospital if you will indicate your willingness to be identified with some of our charities. The names of the members of the Corporation and the Board of Directors are sufficient warrant for the wise use of all funds that may be contributed.

If your circumstances are such that you are not able to contribute to the charity work of the hospital, you can at least do us the favor of reading herein about the work we are doing.

ANNOUNCEMENT

St. Luke's is a general hospital, organized in 1871 under the auspices of the Episcopal Church; but no distinction is made between the various nationalities or creeds, its doors being open to all. Patients are allowed every facility for receiving the consolation of their own churches.

The hospital is situated on Valencia Street, near the junction of Mission street, surrounded by well-kept grounds. It is free from the cold winds, fog and noise of other portions of the city, while at the same time easily accessible by the Valencia Street cars, which pass the door; also by the Mission Street line and the San Francisco and San Mateo electric cars, which pass within a block.

The corps of Attending Physicians and Surgeons is composed of men of known reputation and ability.

The members of the House Staff are also thoroughly efficient and attentive to their duties.

The Directors desire especially to bring St. Luke's Hospital to the notice of patients from a distance who may desire special treatment from surgeons or physicians in the city. Such persons can be accommodated as in a hotel, yet have the care and comfort of a home, and have their own physicians and nurses if desired.

St. Luke's Hospital cares for three classes of patients: In the first class are those who are able to pay the hospital charge for board, nursing and medicines, but are unable to pay for the services of a physician or surgeon; in such cases medical attendance is furnished by the hospital. The second class consists of private patients who select their own physicians or surgeons (who may be members of the attending staff or not), and who come to the hospital for the accommodations it affords. The third class is composed of those who are unable to pay anything to the hospital, and are admitted to the free beds.

All kinds of acute, curable and non-contagious diseases are treated in the hospital. Chronic and incurable complaints may be received and retained at discretion, but will not be

permanently provided for. No patients are admitted suffering from any ailment that would occasion discomfort to other patients.

All reputable physicians and surgeons are invited to send their patients to the hospital, where they may attend them without fear of interference, but the hospital reserves the right to refuse cases from any physician or surgeon, for any reason that the hospital may deem sufficient.

Patients sent into the hospital by physicians not on the hospital staff cannot be treated by any member of the hospital staff except by special request from the doctor sending the patient into the hospital. The Board of Directors desire to extend every hospitality to the physicians of the community at large, and to assure them every attention and courtesy from the resident executive and medical staff. Their orders will receive the same attention as those of the regularly appointed visiting staff. Many conveniences which add greatly to the efficacy of the hospital work are being installed from time to time, and a most satisfactory service is guaranteed to any physician or surgeon treating his patients here.

Complete records are kept of every patient from admission to discharge, to enable those physicians and surgeons who so desire to obtain ready reference to their cases.

The building is new and modern and the different departments have been well equipped with the latest and best apparatus for scientific treatment and for the comfort of the patients.

RATES

Ward Beds	\$17.50 per week
Rooms	\$25.00 per week and up
Private Baths with Rooms	\$10.00 per week extra
Suits with Bath	\$70.00 per week and up.
Maternity Ward	\$50.00 for Two Weeks.
Maternity Rooms	\$60.00 for Two Weeks and up
Detention Rooms	\$30.00 and \$35.00 per week

CHARGES

The above charges include board, lodging and the attention of a nurse on general duty and must be paid weekly in advance. Over-payments will be refunded, but when the service is for less than a week the daily rate will be charged.

EXTRA CHARGES

Nurses—For graduate nurses the charge must be arranged between the patient and nurse directly. A graduate nurse charges \$25.00 per week and up. The Hospital charges \$1.00 per day for the board of graduate nurses.

Medicines and Dressings—Proprietary medicines, serums and excessively expensive medicines will be charged for. Excessive quantities of dressings or special dressings other than those ordinarily used in the Hospital will also be charged for.

X-Ray Work—Charges for X-Ray work vary from \$5.00 to \$30.00. The plates are the property of the Hospital. Duplicates or prints may be obtained.

Operating Room—The charge for the use of the operating room is from \$5.00 up, depending on the time consumed and the nature of the operation. An extra charge is made for gas anaesthesia.

Hydrotherapeutic Treatments—Charges for treatments in the Hydrotherapeutic Department vary from \$1.00 to \$5.00 per treatment.

Pathological Examinations—Ordinary pathological examinations of blood, urine, sputum, feces, etc., will not be charged for. The following class of examinations, however, will be charged for: Histological examinations of tissues, Wasserman reaction, examinations requiring the inoculation of Guinea pigs, autogenous vaccines, etc.

Professional Fees—The professional fee must be arranged between the patient and the physician or surgeon and is not included in the Hospital charge.

VISITORS

Visiting Hours—Visitors are admitted to the wards between 2:00 and 5:00 p. m. and 7:00 and 9:00 p. m.

Relatives and friends will not be permitted to remain in the Hospital over night except by special permission from the Superintendent, when they will be assigned to a room and charged a special rate.

NOTES

Laundry—The personal laundry of the patients will not be done by the Hospital laundry.

Contagious Diseases—No case of a contagious nature will, under any circumstances, be admitted to the Hospital.

Gifts—Under the rules of the Hospital no member of the House Staff, Nurse or Employee, is allowed to receive any compensation or gift from any patient, unless authorized to do so by the Executive Committee.

Valuables—The Hospital will not be responsible for money or valuables, unless deposited in the office.

ENDOWMENTS

St. Luke's has been most magnificently endowed with buildings and grounds but most sadly needs endowments for the free treatment of patients in order to accomplish more of the charity work for which the Hospital was founded and which it is called upon to do in ever increasing amounts. The sum of fifteen thousand dollars will endow a bed in the wards in perpetuity. Thirty thousand dollars endows a private room bed in perpetuity.

A careful estimate has been made, and the income from these endowments provide for the beds being occupied every day of the year.

Endowments of any amount will be gladly received and service will be rendered yearly to the extent of the earning capacity of the amount donated and in strict conformity with the wishes of the donors.

Each one thousand dollars at 5% interest will provide \$50.00 worth of free care each year.

Patients occupying any endowed or partly endowed beds, do so with the understanding that they are to be treated by the members of the Visiting Staff of the Hospital.

FORTY-THIRD ANNUAL REPORT OF THE PRESIDENT

*To the Members of the Corporation
of St. Luke's Hospital.*

GENTLEMEN: I think I may now congratulate you on the actual completion of our new buildings, as planned by the donors, and on the successful working out of the completed plant in every-day practice. From my own observation and from reports made to me by members of the staff and the Administrative authorities, I am convinced there is not much that we would want to change even if we had the opportunity.

Our position as a first-class going concern is now established, and it only remains through conscientious work and judicious publicity to build up our clientele and make the Hospital self-sustaining. Since our last annual meeting a Woman's Board has been formed which has done excellent work in caring for the comfort of patients, providing magazines and pictorial papers and generally looking after the internal condition of the buildings. Its sphere of usefulness will grow, and we are truly fortunate in having the aid and co-operation of such a fine body of women.

The amount of free work done by the Hospital has again creditably increased, being 2,445 days as against 1,931 days in 1913, 1,802 days in 1912, and 860 days in 1911.

Since the opening of the new buildings endowments for free beds have been given us by Mrs. William C. Peyton and by Mrs. Harry Babcock, and I hope we may look forward to the time when more such generous donations may be received and money also contributed for a general endowment fund which will in time enable the Hospital to give absolutely free service in at least 75 of its 150 beds.

During the year ending September 30, 1914, 2,423 patients have been treated as against 1,761 for the previous year; the total number of days of Hospital care have been 27,588 as against 22,429 in 1913. These figures show healthy growth.

Our three active wells are furnishing about 19,000 gallons of water per day as against our summer consumption of 31,000 gallons per day; the new well recently put down is, I regret to say, a practical failure, and we shall now be short of our own water supply to meet even our winter consumption.

The growth of the gardens has been very satisfactory, and another year should see them in perfect condition.

The tennis court has been finished, and this will be a source of healthful recreation and great enjoyment for our nurses.

All relations between the Board of Directors, the members of the Staff, the head of departments and the employees have been harmonious, and we have a right to feel gratified with the work of our colleagues in all branches of our institution.

It is to be regretted that the mortgage of \$32,000 on the Corporation's property still exists, and I sincerely hope that before long some way may be found to wipe this out and so save us \$150.00 per month or more in interest.

I submit for your consideration, also, the reports of the Superintendent, Treasurer, Executive Committee, Residing Physician, Pathologist, Superintendent of Nurses and the Woman's Board.

Respectfully submitted,

(Signed) LOUIS F. MONTEAGLE,
President.

REPORT OF THE EXECUTIVE COMMITTEE

*To the President and Board of Directors of
St. Luke's Hospital, San Francisco, Cal.*

GENTLEMEN: During the year, in compliance with the suggestion made by this Committee a year ago, quarterly meetings of the Board of Directors have been held at the Hospital, at which times there has been the opportunity to meet with the members of the Visiting Staff at luncheon, to discuss questions of material interest, while at the same time the Directors and the Staff have learned to know one another better.

Through the generosity of the donors, many additions have been made beyond what was originally contemplated. The new pipe organ has been installed in the Chapel; two new wells have been sunk; the tennis court has been completed; additional furniture has been provided for the Nurses' Home; many smaller improvements made, in the main building together with some repairs and improvements which under ordinary circumstances would have been charged to the Current Account. The grounds of the Hospital tell the story of how much time and thought was given in planning the laying out and in selecting the shrubbery and plants and the number of patients who visit them show how much they are appreciated.

Your Chairman has visited the Hospital twice a week on the average, besides having many conferences with the Superintendent elsewhere, and wishes to place on record his appreciation of the untiring efforts and the efficiency of the Superintendent, the Resident Physician, the Superintendent of Nurses and all the members of the House Staff.

The increased cost of drugs and supplies, as well as the increased expenses occasioned by the passage of the eight-hour law for nurses, accounts in large part for the heavy advances that have been made from the Sinking Fund, but with the new arrangement made for improving the diet service and the

constantly increasing number of physicians and surgeons who are sending patients to the Hospital, we may reasonably hope for a better showing next year.

Respectfully submitted,

JOHN A. EMERY,

October 1, 1914.

Chairman.

REPORT OF THE AUDITOR

San Francisco, Cal., October 15, 1914.

I HEREBY CERTIFY that I have examined the Building and Sinking Fund Accounts of the Venerable J. A. Emery, Treasurer of St. Luke's Hospital, for the fiscal year ending September 30, 1914, and have found the same correct and in good order.

The cash balances of the Current Account, Building and Sinking Funds have also been reconciled with the bank statements and found correct.

All items of disbursement are supported by proper vouchers, and I have this day verified the securities enumerated in the Sinking Fund Account, and I have found the same on hand and in order.

FREDERICK M. LEE,
Certified Public Accountant.

REPORT OF THE WOMEN'S BOARD OF ST. LUKE'S HOSPITAL

The Women's Board of St. Luke's Hospital was organized Tuesday, December 2, 1913, by Mesdames Whitelaw Reid, Louis F. Monteagle, Harry Babcock, Courtland Benedict, F. H. Beaver, A. S. Baldwin, G. H. Evans, Beverly MacMonteagle, H. D. Pillsbury, H. M. Sherman, W. H. Taylor, C. S. Wheeler, J. H. Wood and Miss W. N. Drown.

Bishop W. F. Nichols opened the meeting with prayer and then spoke on the work he hoped might be accomplished with the aid of such a board of ladies working in conjunction with the Board of Directors.

After this address the meeting was called to order, and Mrs. L. F. Monteagle was duly elected President, Mrs. H. M. Sherman Vice-President, and Mrs. A. S. Baldwin Secretary.

The regular meetings of the Board to be held the second Friday of each month at St. Luke's Hospital at 10:30 A. M.

The Board collects magazines and books, which are distributed once a week in the Hospital.

By the aid of kind and generous friends of the Hospital, the ladies were able to purchase nine trees and Christmas garlands to decorate the Hospital for Christmas, to give a small present to each ward patient, and a card for each tray and one for each nurse.

The Board also purchased and presented to the Hospital thirteen complete outfits to be used for the babies in the Maternity department.

Easter was celebrated in the Hospital by presenting each patient and nurse with a potted plant and a card as an Easter greeting.

There is a Visiting Committee which visits the Hospital once each week and reports each Board meeting, and a Library Committee which has charge of the books and magazines.

Each lady on the Board is responsible for the flowers for the Chapel for one month in the year.

The Board has arranged to have frequent musical services in the Chapel, which give much pleasure to the patients.

On the first Tuesday of the month there is a Choral Vesper service, provided by the boy choir of St. John's Church, of which Mr. Reinhold is the Choir Master.

We thank all the kind friends who have aided us in any way in bringing cheer and comfort to the patients in the Hospital.

So the work has begun, and we hope as time goes by to be able to have established more free beds in the Hospital, thus aiding those who are sick and destitute.

EMMA C. BALDWIN,
Secretary.

REPORT OF THE CHAPLAIN

October 1, 1914.

*Mr. L. F. Monteagle,
President St. Luke's Hospital.*

DEAR SIR: The Chaplain begs leave to report that services have been held in the Chapel on every Tuesday evening at 7:15, and, through the kindness of the Rev. Henry Howitt, a Sunday evening service once a month, with a Celebration of the Holy Communion on the following morning at 6 o'clock. There is also a regular Celebration at 6 A. M. on the first Sunday in each month by the Chaplain or Archdeacon. Since the new organ has been installed, the patients have been better able to follow the hymns and enjoy the organ music which has been furnished from time to time by Mr. Tilton and other organists.

In September part of the choir of St. John the Evangelist Church came to a Tuesday evening service and took the musical part of the service and sang an anthem. It is hoped to have this special choral service at least once a month by different choirs.

The Chaplain has endeavored, at least twice a week, to visit all the patients in the wards and in as many rooms as circumstances would admit for a word of cheer and spiritual counsel as opportunity offered. As stated in his last report, more efficient spiritual ministrations could be rendered if he were resident, so as to have more frequent access to the patients, and a more definite and systematic ministration to the spiritual needs of the Nurses.

Faithfully yours,

FRANK H. CHURCH,
Chaplain.

REPORT OF THE SUPERINTENDENT

*To the Board of Directors,
St. Luke's Hospital.*

GENTLEMEN: Again I have the honor, as Superintendent, to submit to you the report of the Hospital for the year just closed.

During the year the activities of the Hospital have been so diversified that it is hard to know where to start. They may, however, be divided into two main divisions:

1. The gradual adjustment of the working force of the Hospital to the new building, and the adjustment of the building in minor details to the actual working necessities of the Hospital.
2. In broadening out the influence and work of the Hospital and making it more nearly fulfill the objects for which the Hospital was founded by extending its work into fields that were not deemed advisable before.

A resumé of the activities will be given here, and the details will be found in the appended reports.

WOMEN'S BOARD.

During the year a Women's Board has been formed, which has had regular meetings since its inception, and has materially assisted the Superintendent and Superintendent of Nurses with counsel and advice, besides ministering to the comforts of the patients.

This Board has, indeed, opened up a line of usefulness and interest, the importance of which has not, we believe, been realized before by the Hospital authorities.

A detailed statement of the activities of this Board will be found in the following pages.

FRIDAY AFTERNOON CLUB.

In August, 1913, a Club of doctors was formed, principally through the efforts of Dr. Birtch, which has met every Friday afternoon during the year, at which meetings medical and

surgical subjects have been discussed. This has tended to have the members come in closer touch with the Hospital.

The report of this Club will be found appended.

AFFILIATION OF CLINICS.

In having the Clinics of the Canon Kip Memorial Mission and the Cathedral Mission of the Good Samaritan affiliated with the Hospital, another very important step toward rounding out its work has been taken and, in doing this, the Board of Directors have again shown their appreciation of the larger work that the Hospital is now in a position to do.

We feel that these affiliations will work both for the good of the Hospital and the good of the Clinics.

POST-GRADUATE NURSING COURSES.

There has always seemed to be a tendency for Graduate Nurses in this vicinity to feel that, on graduation, their nursing education had been finished, and to make no attempt to fit themselves to become anything more than a "special nurse" for private cases. Very few have taken advantage of the educational facilities of the Eastern hospitals and colleges along this line, so that the Western hospitals have generally had to look to the East when wanting well-trained Nurses for executive positions.

Through the efforts of Miss Brown, Superintendent of Nurses, we have been able to have affiliate with us one of the most widely known educators of Nurses in the United States, Miss Amy G. Pope, who has just started a post-graduate course for Nurses. This course is intended to prepare Graduate Nurses for assuming executive hospital positions, and bids fair to be a very useful adjunct, not only to the Hospital, but also to the education of Nurses in general on this Coast.

A prospectus of this course will be found in another part of this report.

FOLLOW-UP SYSTEM.

Through the efforts of Dr. Harry M. Sherman, and with the co-operation of the staff who are paying the expenses of the first year, we have started a system of writing to all cases

treated at the Hospital one year after they have left and ascertaining how they have been since leaving.

This system has been instituted in some of the other hospitals of this country, notably the Massachusetts General, and has been very instructive and useful both to the doctors and to the Hospital. It has also been recommended by the Clinical Congress of Surgeons of North America as a step toward the standardizing of hospitals, and can, therefore, be considered as a nation-wide movement.

The system, as in use at the present time, has, as far as we know, been confined to surgical cases. We, however, are applying it to all cases so as to serve all of our various classes of cases.

This was started on July 1, 1914, and, therefore, not much data has been obtained to date, but what has been obtained has been instructive and interesting, and can be found in another part of this report.

IMPROVEMENTS.

Through the generosity of the same friends of the Hospital that has made our present prosperous condition possible, the following improvements have been made that have materially assisted our work:

The pipe organ that has been installed in the Chapel and has added much to the service and has been a great source of pleasure to patients and everyone.

The Mills Building and old Main Building have been overhauled, placed on permanent foundations, and will be serviceable for years to come.

The furnishing of the Nurses' Home has been completed.

The X-Ray room has been remodeled and a stereoscope and fluoroscope have been added.

Three wells have been sunk and a supply of good water obtained, but unfortunately not enough for our needs, so that we are now sinking a fourth well, with the expectation of soon having all the water we need. The water furnished now by the wells has reduced our bill from about \$250.00 per month to about \$90.00.

The sterilizing room has been completely tiled and the hallway in the operating department has had a tile wainscoting added.

A tennis court on the lower part of the grounds has just been completed, and is affording the outdoor exercise needed by the Nurses.

THE NURSES' ALUMNI ASSOCIATION.

The Nurses' Alumni Association has had several meetings during the year and has shown a very decided interest in the Hospital. We publish in another part of this report a statement of the work they have been doing.

RESIDENT STAFF.

Dr. W. H. Hill, a graduate of the Creighton Medical College, Omaha, Neb., came on duty February 25th, 1914.

Dr. G. A. Kelly resigned March 17th, 1914.

Dr. J. M. Lacey, a graduate of the Medical Department of the University of Illinois, came on duty June 21st, 1914. Resigned August 27th, 1914, to take an internship at the Los Angeles County Hospital.

Dr. J. W. Ballard, a graduate of the Medical Department of the University of Southern California, came on duty June 22nd, 1914.

Dr. Thos. A. McIntyre, a graduate of the same school, came on duty July 13th, 1914.

Dr. E. H. Nast, a graduate of the Chicago College of Medicine and Surgery, came on duty September 14th, 1914.

Miss Ethel Townsend, R. N., has been made assistant in the laboratory and has been of great aid in doing the increased work of that Department.

The department of purchasing and supplies has been placed in the charge of Mr. J. A. Maguire and many additions and improvements have been made, as will show in another part of this report.

NEEDS OF THE HOSPITAL.

In the report of the President will be found mentioned the most vital needs of the hospital at this time. Besides these we

feel that the hospital should be in the position of not only having all of the apparatus and instruments that have been absolutely proven to be necessary for the physicians and surgeons of today, but also to have things that are being tried out; in other words, to experiment with equipment. This might lead to the collection of a lot of junk but also might result in the adaptation of many things that not only would be of benefit to the doctors but also to the patients and to the hospital.

Below will be found a list of those things that occur to me at this time.

Dictating phonographs to assist doctors in keeping better and more accurate histories. Cost about \$300.00.

A McKenzie Modified Polygraph for studying more accurately the action of the heart than can be done by the senses alone. Cost about \$100.00.

Electro cardiograph for studying the action of the heart by electrical methods. Cost about \$1500.00.

Micro photographic apparatus for taking photographs of microscopical slides. Cost about \$700.00.

A high frequency electrical machine for the application of electricity in certain conditions and for fulguration. Cost about \$300.00.

A Balopticon to be used for instructing both the pupil and graduate nurses. Cost about \$500.00.

Elapsed time recorders for recording the length of time that elapses between the time that a patient calls for a nurse and the time the nurse answers the call. Cost about \$1000.00.

Automatic photographic plate developer for the X-ray room. Cost about \$50.00.

CHARITY WORK.

With the increase of our patients there has also been a decided increase in charity work, so that during the year more charity work has been done than ever before in the history of the hospital; 2445 days of free treatment have been furnished at a cost of \$10,155.45.

COMMENT ON STATISTICS.

The increased number of pay patients treated during the year, together with the fact that during the summer months there was a steady and gradual increase of patients, gives us every expectation that during the coming winter months our number of patients will be brought up to the number to assure us of collecting enough to pay our bills.

It is in view of the above that we find our financial statement not discouraging, although a deficit still shows.

We have had during the year one month when the number of patients averaged 90 and in that month there was a surplus and not a deficit.

If we assume that prices of supplies will continue as they are at present, a slight increase in the average number of patients will assure us of coming out even.

In other words, in order to run this institution on an even keel, and that means running it as it is constituted at present and not as it may be necessary to constitute it in the future; we must have an average of 90 patients.

The increased cost of certain supplies legitimately due to the war, the increased cost of certain supplies apparently illegitimately raised with the war as an excuse, the tendency before the war toward not only an increase in the cost of luxuries demanded by patients but also of staples compel us to view the situation most seriously.

It is therefore, during the next year, hard to prophesy just how much the hospitals are going to be affected by the increased cost of maintenance due to present conditions. Already the cost of maintaining our drug room and laboratory have increased very markedly. Our operating room instruments and supplies have also increased and, as you all know, the cost of certain food supplies has gone up very markedly. Just what will be the result no one can say at this time.

There is one other phase of our finances that has been given most serious consideration during the year, but up to date we are not by any means satisfied with the improvements that have been made. I refer to the relatively large percent-

age of uncollected earnings. The amount to be collected for the year was \$116,199.47, while our collections were only \$109,193.05, leaving \$7,006.42 uncollected, or 6 per cent of the total to be collected. This percentage is much too high.

TRAINING SCHOOL.

During the year many changes have occurred in the school.

On April 1, 1914, Miss Colvin, Superintendent of Nurses, resigned to assume a similar position at the Royal Columbian Hospital at New Westminster, British Columbia. On May 1st, 1914, Miss McGillivray, Assistant Superintendent of Nurses, resigned to join Miss Colvin.

Miss Esther A. Brown, of the Presbyterian Hospital of New York, accepted the position of Superintendent of Nurses and came on duty April 29th, 1914. The various other changes in the personnel of the officers of the School will be found in the Training School report.

The increase in the number of pupil nurses has been very gratifying indeed and the number of applications for entrance to the school that have been received since Miss Brown took charge assures us of keeping up the number of nurses to not only enough to do the actual work of nursing but also to broaden out the training of the nurses with social service work, clinical work and the observation of activities along the various lines of work correlated with nursing.

The eight-hour law for women has been in force for the last year and although we are complying with it we feel that as it stands at present it does not work either to the best interests of the nurses or of the patients. Many of the provisions of the law appeared at the start to be almost insurmountable but, however, they have proven to be not hard to accomplish by increasing the number of pupil nurses and employees and thereby increasing the cost of hospital treatment to the patients.

OFFICIAL OPENING OF NEW BUILDING.

On Thursday, January 29th, 1914, Bishop Nichols conducted a service of benediction in the Chapel and the tablet

commemorating the gift of the hospital was unveiled by Mrs. Louis F. Monteagle. The formal opening that followed was attended by hundreds of our church people and citizens of the city.

The success of this reception will I trust prompt the Board of Directors to repeat it each year.

ACKNOWLEDGMENTS.

The Rev. F. H. Church continues as Chaplain and has rendered faithful and conscientious service. Ven. J. A. Emery and Rev. H. Howitt have at times acted in his place. We wish to thank the above and also all of the different members of the clergy who have ministered to the patients at different times during the year. Respectfully submitted,

WM. R. DORR, Superintendent.

GENERAL STATISTICS

	Year ending Sept. 30th.	
	1914.	1913.
Number of patients treated during the year.....	2,423	1,761

REPORT OF ST. LUKE'S CLINICAL CLUB.

About the first of October, 1913, a club of medical men in active practice was formed, for the purpose of discussing cases of interest, and in order to enable the attending physician to obtain the views of the members. The first meeting was held at the Hospital on October 3rd.

Through the efforts of Dr. F. W. Birtch, Resident Physician, arrangements have been made by which the clinical histories and autopsy reports of Dr. Richard Cabot, of the Massachusetts General Hospital, are obtained and discussed each week. In addition reports from Dr. Knapp, of the Pathological Laboratory, and Dr. Ruggles of the X-ray Laboratory are furnished and have proved invaluable in arriving at correct diagnoses. The Club is also furnished with full access to the pathological sections and the X-ray plates.

In addition, experts in special subjects are frequently present, and give their views and clinical experiences. The method of procedure is such that the views of all the members are obtained upon cases presented, thus giving the patient what is practically the advantage of a general consultation. In addition, wherever an error in diagnosis is discovered, the reasons for such error are fully investigated.

The membership has largely increased, and the attendance is large. All medical men in good standing are invited to become members of the Club, and to participate in its investigations and discussions.

(Signed)

HARRY PARTRIDGE, M. D.,
Secretary.

REPORT OF THE DEPARTMENT OF PURCHASES AND SUPPLIES

To further standardize the working of this hospital, and secure a comparative cost statement, a change has been made in the method of handling the store rooms, and purchases.

A Department of Purchases and Supplies, under the immediate supervision of the Superintendent, has been instituted.

The theory of work is that every item of expense is the result of the receipt, issue and use of a supply, including salaries, taxes, etc. In the office of this department is kept a record of

- (a) The origin and authorization for incurring the expense.
- (b) The steps taken to secure the supply, such as bids, contracts, etc.
- (c) The receipt of the supply or completion of the service.
- (d) The cost of the supply.
- (e) The disposition of the supply, entailing a proper system of requisition.
- (f) A check of the bill and its transmittal to the Cashier for payment.

As the books of this Department will show separately the reserve stock as well as the unexpended portion of an expense from the actual expense for the month, it is hoped to show a monthly statement during the coming year, which will give the accurate expense for that particular month and allow a comparison of one month with another, department by department. For example, insurance paid in one month will be prorated over the months in the entire period for which paid.

Finally we will show the actual cost of each patient to the Hospital.

Thus it will be seen that this Department consists of three divisions—a division of purchases, a division of supplies, and a division of auditing.

REPORT OF THE FOLLOW UP SYSTEM.

The following is a resumé of the work done in this department since its start on the first of July of this year.

All doctors who bring cases to the hospital were sent the following letter:

ST. LUKE'S HOSPITAL
27th and Valencia Strets

San Francisco,.....191

Dr.

.....

Dear Doctor:—

This Hospital has been attempting for some time to introduce a system of following up cases that have been treated here and learning their condition six months or one year after their discharge from the Hospital, believing that this information would not only be of benefit to the doctor who was in attendance on the case but also to the Hospital.

This system has been instituted in some of the other hospitals of this country, notably the Massachusetts General, and has been very instructive and useful both to the doctors and to the Hospital. It has also been recommended by the Clinical Congress of Surgeons of North America as a step toward the standardization of hospitals and can therefore be considered as a nation-wide movement.

The system as in use at the present time, has as far as we know, been confined to surgical cases. We, however, propose to apply it to all cases so as to serve all our various classes of cases.

Before, however, writing to your patients we desire to lay the matter before you and see if it meets with your approval or not.

A summary of the answers from your cases would be forwarded to you so that you may receive full information.

If you do not desire us to do this we would very much appreciate having you tell us your reasons and returning the same in the enclosed addressed envelope, but if you do wish us to do this will you please sign the enclosed card and return it in the enclosed addressed envelope so we may have full authority for writing to your patients.

Respectfully,

Superintendent.

The cards enclosed with these letters read as follows:

San Francisco,.....191....

Permission is hereby granted St. Luke's Hospital to write to any or all of the patients who have been treated by me in this hospital, inquiring as to their condition, at the time they receive the letter.

I agree to this with the understanding that reports of all answers received about my patients will be sent to me and that this will be done without any obligation on my part.

SignedM. D.

Address

These cards when returned are filed alphabetically and only the cases of doctors who have given us their permission in writing have been written to.

The result of this for the first three months ending September 30, 1914, has been as follows:

Doctors written to	234
Permission granted	153
Permission not granted	11
Not heard from	70

The following letter is sent to patients one year after leaving the hospital:

ST. LUKE'S HOSPITAL
27th and Valencia Streets

San Francisco,.....191

Mr.....

Dear.....:

This Hospital is desirous of keeping in touch with all of the patients who have been treated here.

Dr.....who treated you during your stay here from.....to.....has authorized us to send you this letter and will be very much interested in your reply.

Will you therefore favor us with a brief statement on the back of this sheet as to just how you have been since leaving this hospital, with special reference to the condition for which you were then treated? We especially wish to know how the trouble for which you were treated here has turned out. Has that trouble been

entirely relieved? Are you now well? Have any other troubles developed?

Please send your reply in the enclosed stamped and addressed envelope.

Thanking you in advance for your courtesy in this matter, we remain,

Respectfully,

Superintendent.

The result of these letters can be seen in the table below:

	July	August	September	Total
Patients discharged.....	147	150	160	457
Letters not sent:				
Deaths.....	9	7	14	30
Obstetrical cases.....	11	7	5	23
Doctors refused.....	8	5	2	15
No answers from doctors.....	29	40	24	93
Died since leaving.....	3			3
No address.....		11	25	36
Re-entries.....	6 66	6 76	10 80	22 222
Letters sent.....	81	74	80	235
Letters answered.....	20	16	16	52
Letters returned.....	12	20	13	45
Letters not answered.....	49 81	38 74	51 80	138 235
Summary of Answers:				
Perfectly well.....	8	12	9	29
Improved but not well.....	5	2	2	9
No improvement.....	3		1	4
Condition same but general health improved.....	1			1
Not well but improving and hopes for recovery.....	1	1		2
Cured of original trouble but has others.....	2		4	6
Died.....	20	1 16	16	1 52

There are several figures in the above that are interesting and not flattering.

1st. The large percentage of cases noted as "no address," so that this new system, aside from the medical value that may be attached to it, is also certainly a good check on our records.

2nd. The large percentage of doctors who have not answered our letter, neither giving us permission to write to their cases nor refusing to permit us to inquire.

3rd. The fact that quite a few doctors have refused to permit us to send letters to their patients for the reason that they would not trust the hospital to act as their confidential agent.

REPORT OF THE TRAINING SCHOOL TO THE BOARD OF DIRECTORS OF ST. LUKE'S HOSPITAL

GENTLEMEN: We begin tomorrow the twenty-sixth year of the work of the training school. We venture to hope that in the years to come the influence of its graduates, and their usefulness in the community may be as beneficial as in the past.

At the beginning of the school year there were enrolled forty students.

To aid in meeting the requirements of the eight-hour law it was necessary to increase the number of nurses in training, and to add to the number of graduate head nurses.

During the year there have been admitted.....	45
Disqualified	21
Graduated	10
To begin the new year there are present—	
Student nurses	55
Graduate nurses	11

The commencement exercises were held in the Chapel on the evening of May 5th.

Bishop Nichols conducted the services preceding the presentation of the diplomas and pins by Mr. Louis Monteagle, President of the board of managers. Following this was an interesting and inspiring address to the graduating class by Dean Gardner of Stanford University.

The evening ended with a reception and dance in the nurses' home.

The staff and student nurses wish to express their appreciative thanks to the members of the Women's Board for their many acts of kindness in arranging the nurses' home for their much increased comfort, pleasure, and for their continuous care and thoughtfulness.

We are also greatly indebted to our staff of lecturers for giving so freely of their valuable time to the school. The continued co-operation, interest and forbearance of the attending physicians and surgeons is also greatly appreciated.

The Alumni Association of the Training School has been especially active during the last year, and an account of their work will be given later.

Respectfully submitted,

(Signed)

ESTHER ALLISON BROWN,
Director of Nursing.

September 30, 1914.

INFORMATION FOR APPLICANTS

Introductory Statement

St. Luke's Hospital, organized in 1871, under the auspices of the Episcopal Church and begun in a small way, is now one of the most beautiful and perfectly equipped on the continent.

In connection with it has been built a home for nurses—fireproof and lacking nothing that might add to its comfort and convenience.

Requirements for Admission

Candidates for admission should be able to meet the following requirements:

1. A complete high school education or a two years' high school course or its equivalent in a recognized school together with two years of special study, or an occupation that would be considered preparatory to the study of nursing.

2. Home training and influences fitted to form good moral character, and lay the foundation for the future work of the nurse.

3. Good physical condition. Candidates are preferred, between 20 and 30 years of age, of strong physique and not under average weight and height.

General Information

The work of nursing demands intelligence, good temper, an orderly habit of mind, thorough trustworthiness, and a willing spirit. No one should enter upon this work except with a strong sense of duty and a readiness to conform to the necessarily strict rules of discipline. The Superintendent of the Hospital and the Superintendent of the Training School decide as to the acceptance of candidates for the preliminary term. A limited number only can be received. The declination, therefore, of a candidate is no reflection on the individual's character. The reasons for declination are not given either to applicants for admission or to probationers on duty.

Candidates should be vaccinated within the year previous to their coming to the Hospital. Their teeth should also be in good condition.

Undergraduate Students.

Candidates if accepted are admitted as vacancies may occur and must serve for a probationary period of six months; if satisfactory at the end of that time they will sign an agreement to remain in the school for three years, and to conform to its rules and regulations. The right is reserved by the Hospital authorities to dismiss a pupil at any time for inefficiency, misconduct, neglect of duty, failure to pass examination, inability to develop qualities fitting the profession she desires to enter, or for any other reason that may seem to them adequate.

Vacation

As the weekly service at the present time is forty-eight hours the vacation may not be more than a week a year.

Sickness

All students are cared for gratuitously when ill and receive the professional services of the physician of the school. Time lost through illness or for any other reason must be made up.

Examinations

Examinations, written and oral, are held at stated periods, those upon special subjects being conducted by the instructors at the close of each course. They are both written and oral, and include practical tests. The standing of the pupil is based upon the general character of work throughout the year as well as the results of examinations.

Graduation

The diploma of the school is awarded to those who have completed satisfactorily the full term of three years, and have passed the final examinations. Nurses are then entitled to examination for registration in this State.

The Course of Instruction

Covers a period of three years, and includes practical demonstration, classes and lectures in the following:

The Theory and Practice of Nursing.

Nursing Ethics	Dietetics	Diseases of the Eye
Anatomy	Materia Medica	Ear, Nose and Throat
Physiology	Medicine	Urinalysis
Hygiene	Surgery	Infectious Diseases
Bacteriology	Obstetrics	

As St. Luke's Hospital is an institution under the auspices of the Episcopal Church, the management requires from the nurses that neither by word nor act shall any nurse assume any position or express any opinion antagonistic to the Church and its teachings. When their duties will permit all nurses are expected to attend the services in the Chapel, unless excused by the Superintendent of Nurses.

Any further information desired may be obtained by applying to the Superintendent of Nurses, St. Luke's Hospital, San Francisco, California.

OUTLINE OF POSTGRADUATE COURSE FOR NURSES IN HOSPITAL MANAGEMENT

This course being a new departure, the details are subject to revision and correction.

Course of Instruction

The selection of the practical work in this course was based on the purpose of providing practice in (1) governing the various departments of hospitals and schools for nursing and (2) teaching student nurses.

The work will, therefore, be about as follows:

Practical Work

Assisting in the supervision of kitchens, laundry, linen room, nurses' home, wards and the serving of food.

The arranging of menus and special diets.

The care of food and other hospital supplies.

Assisting in the hospital office and school office.

Theoretical Work

Physiology—Lectures and recitations.

Chemistry—Inorganic chemistry, household chemistry, physiologi-

cal chemistry—Lectures, recitations and laboratory work.

Dietetics—Lectures, recitations and laboratory work.

Bacteriology—Lectures, recitations and laboratory work.

Methods of Teaching—Lectures and practice.

Hospital Bookkeeping—Lectures and practice.

Requirement for Admission

This course is open to graduates of registered schools of nursing who are between twenty-five and thirty-five years of age and can furnish evidence of moral, mental and physical efficiency.

The applicant must fill out the enclosed form and send it to the Superintendent of Nurses of St. Luke's Hospital, San Francisco, Cal., together with a letter from the Superintendent of Nurses of the school from which the applicant graduated, also letters from two or more responsible people under whom she has worked since graduation and one from a physician stating the condition of health.

General Information

Applicants must obligate themselves to remain in the Hospital for six months. During this time their board and lodging will be furnished and a limited amount of laundry will be allowed. The only fee connected with the course will be fifteen (\$15.00) dollars to cover laboratory expenses and a deposit of ten (\$10.00) dollars must be made to pay for breakage of chemical appliances; money not required for this purpose will be refunded.

Students who satisfactorily complete the course will be given a certificate and efforts will be made to assist them in obtaining positions.

REPORT OF THE NURSES' ALUMNI ASSOCIATION

San Francisco, Cal., September 30, 1914.

*To the President and Directors of
St. Luke's Hospital.*

GENTLEMEN: It is my privilege to present to you the annual report of the Alumni Association of St. Luke's Hospital Training School for Nurses, for the past year.

Regular monthly meetings have been held at the nurses' home, and now the membership is ninety, twenty-six having been admitted during the year. A special meeting was called in April to confer with the Women's Board; at this meeting plans were discussed for raising funds for the relief of sick members.

Mrs. Whitelaw Reid headed the donations for our sick fund, the members have responded generously, and final plans have been made for a bazaar to be held in the nurses' home on October 29th, and the members of the Women's Board have consented to serve as patronesses.

At the June meeting Miss E. A. Brown, superintendent of the Training School, was elected an honorary member. At the July meeting a class in parliamentary law was started by Wm. Harper, a young attorney and husband of one of our members.

At the request of Miss Brown, the President addressed the pupils of the Training School on the benefits to be derived from membership in the Alumni, and the objects of the bazaar.

Respectfully submitted,

(Signed)

ANN HILL,
President Alumni Association.

LIST OF GRADUATES OF THE TRAINING SCHOOL

(Any additional information for this list will be gladly received. Address communications to Miss S. Schrepfer, Secretary of Alumni Association, care of St. Luke's Hospital.)

FORM OF BEQUEST.

To those who may feel disposed to donate by Will to St. Luke's Hospital, the following is submitted as a form:—

FORM OF BEQUEST OF PERSONAL PROPERTY.

I give and bequeath unto "St. Luke's Hospital," a corporation existing under the laws of the State of California, the sum of.....Dollars, to be applied to the use of said corporation.

FORM OF DEVISE OF REAL ESTATE.

I give and bequeath unto "St. Luke's Hospital," a corporation existing under the laws of the State of California, for its corporate purposes, all [here insert description of property].

Together with all the appurtenances, tenements, and hereditaments thereunto belonging or in any wise appertaining. To have and to hold the same unto the said corporation, its successors and assigns forever.

Section 1313 of the Civil Code of this State provides that "No estate, real or personal, shall be bequeathed or devised to any charitable or benevolent society or corporation, or to any person or persons in trust for charitable uses, except the same be done by will duly executed at least thirty days before the decease of the testator; and if so made at least thirty days prior to such death, such devise and legacy, and each of them, shall be valid; *provided*, that no such devises or bequests shall collectively exceed one-third of the estate of the testator leaving legal heirs, and in such case a pro rata deduction from such devises or bequests shall be made, so as to reduce the aggregate thereof to one-third of such estate; and all disposition of property made contrary hereto shall be void, and go to the residuary legatee or devisee, next of kin, or heirs according to law."
